Experience

poiro.com **Jul 2026 – Present**

Fullstack Developer Intern *Python, FastAPI, MongoDB, Redis, Celery, Next.js, TypeScript, Cloudflare R2*

- **AI Workflow Orchestration:** Built the node and group system behind the AI workflow builder: each workflow is a DAG of generation steps with typed ports and a defined execution order, and groups bundle steps into nested sub-workflows that run as one unit.
- **Fail-Closed Spend Caps:** Integrated Pixabay, Unsplash, and Pinterest behind one adapter contract with per-org Redis caching, and capped provider calls fail-closed at **500 per org per day** and **5,000 per day globally** so no workflow can run up vendor costs.
- **Digital Asset Service:** Designed the org-scoped MongoDB models and FastAPI backend for one asset service shared by **3 apps**, migrated existing assets into it, and added upload-time duplicate blocking with pHash and dHash image similarity.

klimb.io **Nov 2025 – May 2026**

Full Stack Developer Intern *TypeScript, Express.js, PostgreSQL, Redis, AWS, OpenAI Realtime*

- **AI Interview Platform:** Engineered the backend for a **3-stage** AI interview platform used by **hundreds of candidates**, with automated proctoring and strict candidate-level data isolation.
- **Live Voice Interview Round:** Developed the round on OpenAI Realtime that asks each candidate questions drawn from their resume and scores the transcript into a structured result for recruiters.
- **Auditable Usage Ledger:** Replaced on/off feature flags with a PostgreSQL credit ledger that records every use of **6+ AI features**, which made usage-based billing possible.

Projects

CodeSM | GitHub | Live | *Node.js, BullMQ, Redis, PostgreSQL, Docker*

- **Sandboxed Code Execution:** Architected a code platform that runs untrusted submissions in **6 languages** in Docker with no network, a read-only filesystem, and CPU, memory, and time limits, graded on BullMQ workers off the request path.
- **AI Interview Practice:** Added Gemini-generated hints (four per problem) and resume-personalized interview questions with written-answer scoring.

DeepDoc | GitHub | *RAG, TypeScript, Azure OpenAI, Pinecone, PostgreSQL*

- **LLM Evaluation Harness:** Created a **36-case** evaluation harness (**6 multi-turn**, including Hinglish and prompt-injection cases) that replays retrieval sweeps, A/B tests prompts, and separates indexing, retrieval, and generation failures; it caught a bug that blanked every retrieved chunk.

Hireflow | GitHub | *Node.js, BullMQ, PostgreSQL, Gemini, GPT-4o-mini*

- **Guardrailed LLM Pipeline:** Shipped an AI job-application engine that parses listings into structured stack and seniority with Gemini, rewrites resume bullets with GPT-4o-mini, and rejects any rewritten skill not in the real profile; used for real applications.

Skills

Languages: Python, TypeScript, SQL, C++
AI Engineering: LLM evaluation, RAG, context engineering, embeddings and vector search, query rewriting, prompt A/B testing, OpenAI Realtime
Backend: FastAPI, Node.js, Express.js, REST APIs, Celery, BullMQ, WebSockets
Data & Infrastructure: Data modelling, PostgreSQL, MongoDB, Redis, Pinecone, Docker, Kubernetes, AWS (EC2, S3)
Frontend & Tooling: React, Next.js, Playwright, Git, Linux, CI pipelines

Education

Indian Institute of Information Technology Nagpur **Nov 2022 – May 2026**

B.Tech in Computer Science and Engineering *Nagpur, Maharashtra*

Achievements

- **Competitive Programming: Top 5% globally** on LeetCode (**1800+ rating**, 800+ problems solved) · **3-star** on CodeChef (1700+) · Pupil on Codeforces.
- **Hackathon: 3rd place** at Tantrafiesta 2024, IIIT Nagpur.
