Education

Indian Institute of Information Technology, Nagpur — **November 2022 – May 2026**
B.Tech in Computer Science and Engineering — *Nagpur, Maharashtra*

Experience

poiro.com — **July 2026 – Present**
Fullstack Developer — *Python, FastAPI, PostgreSQL, Cloudflare R2, TypeScript*

- **Storage Integrity and Deduplication:** Engineered storage-verified **SHA-256** deduplication in **Python**/**FastAPI** with a **PostgreSQL** uniqueness guarantee and client-side preflight, preventing duplicate **Cloudflare R2** writes under concurrent uploads without trusting client-supplied hashes.
- **Asset Data Model and APIs:** Built the data model, services, and APIs for the asset layer behind AI-generation surfaces; fixed reference-integrity defects that hid nested folders and AI-lineage assets, and replaced depth-dependent tree traversal with a **single SQL aggregation query**.
- **Codebase Reliability:** Cleared approximately **1,041 Ruff findings across 7 Python trees**, made lint/format checks blocking in CI and pre-push, and added dynamic package discovery so new packages are covered automatically.

klimb.io — **November 2025 – March 2026**
Full Stack Developer Intern — *Node.js, TypeScript, PostgreSQL, Redis, AWS (S3, EC2)*

- **Usage Metering and Credit Ledger:** Designed a PostgreSQL-backed usage-metering and credit ledger across **6+ AI features**, replacing binary feature flags with an auditable per-feature consumption record for finance.
- **Query Performance:** Rewrote slow **SQL** queries and restructured recruiter-dashboard data access, reducing p95 latency and memory overhead under concurrent load.
- **Session Isolation:** Developed backend services for a **3+ stage** AI interview platform with automated proctoring and strict candidate-level data isolation across concurrent live sessions.

Projects

Hireflow | GitHub | *TypeScript, BullMQ, Redis, PostgreSQL, Gemini, Playwright*

- **Multi-Source Ingestion and Dedup:** Created an ingestion pipeline over **4 sources** (LinkedIn, Wellfound, YC, Telegram via GramJS) that parses stack and seniority with **Gemini** and drops cross-source duplicates with **SHA-256 fingerprints** of normalised title, company and description.
- **LLM Output Validation:** Implemented a validator that rejects any GPT-4o-mini rewritten skill not present in the candidate's real profile, so the model's output cannot invent data, with each stage on its own **BullMQ** queue so one blocked source never stalls the rest.

Storix | GitHub | Live | *Python, FastAPI, Celery, Redis, PostgreSQL, AWS S3*

- **Async PDF Extraction Pipeline:** Architected a **FastAPI** upload path that hands PDF extraction to **Celery** workers off the request path, relaying each stage's progress through Redis pub/sub to the client over WebSockets.

Yuvro | GitHub | Demo | *Python, FastAPI, PostgreSQL, Kubernetes, AWS S3*

- **Content-Addressed Storage:** Deduplicated workspace files with **SHA-256 content-addressed S3 storage** with template manifests and garbage collection, and modeled the file tree as a self-referential PostgreSQL table indexed on **3 composite keys** for fast lookups.

CodeSM | GitHub | Live | *Node.js, BullMQ, Redis, PostgreSQL, Docker*

- **Sandboxed Execution Engine:** Shipped a BullMQ + Redis pipeline that grades untrusted code in **6 languages** inside **Docker** with CPU, memory, network and timeout limits, fetching S3 test data one case at a time to bound per-job memory.

Technical Skills

Data Systems: SQL, PostgreSQL, Redis, MongoDB, Prisma, Cloudflare R2, AWS S3, data pipelines, ETL, deduplication, content-addressed storage
Backend & APIs: Python, FastAPI, Node.js, Express.js, REST APIs, WebSockets, Celery, BullMQ, distributed job processing
Infrastructure & Runtimes: Docker, Kubernetes, Linux, Nginx, AWS (EC2, S3), CI/CD, Git
Languages & Automation: Python, TypeScript, JavaScript, C++, LLM integration (Gemini, GPT-4o-mini), Playwright, Ruff

Achievements

- **Competitive Programming: Top 5% globally** on LeetCode (**1800+ rating**, 800+ problems solved) · **3-star** on CodeChef.
- **Tantrafiesta 2024: 3rd rank** at IIIT Nagpur's hackathon.
