Experience

poiro.com **Jul 2026 – Present**
Fullstack Developer Intern *Python, FastAPI, MongoDB, Redis, Celery, Next.js, React, TypeScript*

- **Full-Stack Asset Service:** Designed the org-scoped data models and FastAPI backend, and built most of the shared Next.js frontend, for one asset service used by **3 apps**, with keyset pagination, direct uploads to Cloudflare R2, and pHash/dHash duplicate blocking.
- **AI Workflow Builder:** Implemented the node and group system in a React Flow canvas where each workflow is a DAG of AI generation steps with typed ports and a defined execution order, and nested groups run as sub-workflows.
- **API Integrations and Spend Caps:** Integrated Pixabay, Unsplash, and Pinterest behind one adapter contract with per-org Redis caching and fail-closed caps of **500 calls per org per day** and **5,000 per day** globally.

klimb.io **Nov 2025 – May 2026**
Full Stack Developer Intern *TypeScript, React, Express.js, PostgreSQL, Redis, AWS, OpenAI Realtime*

- **Production AI Interview Platform:** Engineered the backend for a **3-stage** AI interview platform used by **hundreds of candidates**; its live voice round on OpenAI Realtime asks questions from the candidate's resume and scores the transcript.
- **Usage Ledger in PostgreSQL:** Built a credit ledger that records every use of **6+ AI features** as an auditable per-feature log, which made usage-based billing possible.

Projects

DeepDoc | GitHub | *Next.js, TypeScript, Azure OpenAI, Pinecone, PostgreSQL*

- **RAG Pipeline:** Developed structure-aware chunking, document-scoped semantic search on Pinecone, and follow-up question rewriting from chat history, then ranked, deduplicated, and packed context into a token budget, tuned across **100+ configurations**.
- **LLM Evaluation Harness:** Created a **36-case** eval harness (**6 multi-turn**, including Hinglish and prompt-injection cases) that replays retrieval sweeps, A/B tests prompts, and separates indexing, retrieval, and generation failures; it caught a bug that blanked every retrieved chunk.

Hireflow | GitHub | *Node.js, BullMQ, PostgreSQL, Gemini, GPT-4o-mini, Playwright*

- **Guardrailed LLM Pipeline:** Shipped an AI job-application engine that ingests listings from **4 sources**, deduplicates them with SHA-256 fingerprints, rewrites resume bullets with GPT-4o-mini, and rejects any rewritten skill not in the real profile; used for real applications.

CodeSM | GitHub | Live | *React, Node.js, BullMQ, PostgreSQL, Docker*

- **Sandboxed Execution:** Architected a code platform that grades untrusted code for **6 languages** in locked-down Docker containers on BullMQ workers, off the request path.

Skills

Languages: Python, TypeScript, JavaScript, SQL, C++
Frontend: React, Next.js, React Flow, WebSockets
Backend & Data: FastAPI, Node.js, Express.js, REST APIs, PostgreSQL, database design, MongoDB, Redis, Celery, BullMQ
AI Engineering: RAG, LLM pipelines, semantic search, vector databases (Pinecone), embeddings, query rewriting, LLM evaluation
Infrastructure & Tooling: Docker, Kubernetes, AWS (EC2, S3), Git, CI/CD pipelines, Linux

Education

Indian Institute of Information Technology Nagpur **Nov 2022 – May 2026**
B.Tech in Computer Science and Engineering *Nagpur, Maharashtra*

Achievements

- **Competitive Programming: Top 5% globally** on LeetCode (**1800+ rating**, 800+ problems solved) · **3-star** on CodeChef (1700+) · Pupil on Codeforces.
- **Hackathon: 3rd place** at Tantrafiesta 2024, IIIT Nagpur.
